| Rate of pay, hourly rate of pay | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * | * |

¹ Beginning in 1994, characteristics of the current or most recent job were collected in the first Employer Supplement loop, rather than in the CPS section. To maintain consistency, these questions are still included in this section of the table.

² Note that, beginning in 2002, the questionnaire includes separate sets of questions for self-employed respondents and respondents with nontraditional employment arrangements. The information collected is very similar to the regular employment questions, but wordings may vary to accommodate different situations. The three types of employer questions are not represented separately in the table.

Table 3.6. Selected NLSY79 variables by survey year: Respondents ages 14 to 22 in 1979
